Pest Tracker

May 28, 2003

OFM	1st BF	2nd BF	3rd BF	4th BF	DD	DD Date		Avg. Daily DD	
Yuba City	5-Mar	20-May			265	28-May		33.1	

Notes: I accidently put second flight BF as March 20 instead of May 20 last week. Please change
Spray timining is 500-600 DD projected around June 7 - 11 based on avg temps.
DD are accumulating more slowly in Marysville and Nicolaus CIMIS station where it is cooler.
OFM is unpredictable this year, make sure to base spray decisions from your own orchard.

CM	1st BF	2nd BF	3rd BF	DD	DD Date			Avg. Daily DD	
Yuba County	30-Mar			628	28-May			23.1	

If second peak, usually around 600-700 DD. Spray if peak is larger than first peak.
CM is unpredictable this year, make sure to base spray decisions from your own orchard.

PTB									
Yuba City	1st BF	2nd BF	3rd BF	DD	DD Date			Avg. Daily DD	
	10-May			382	28-May			24.6	

Notes:

We caught some PTB on 5/5 and during that week in one orchard. Set BF from another orchard.
Spray timing is 400-500 DD
Biofixes are quite different between orchards

SJS									
Yuba City	1st BF	2nd BF	DD		DD Date			Avg. Daily DD	
	2-Apr		658		28-May			24.1	

OBLR									
Yuba City	1st BF	2nd BF	DD		DD Date			Avg. Daily DD	
	13-May		302		28-May			18.3	

NOTES:

Submitted by Janine Hasey, UC Farm Advisor, Sutter and Yuba Counties
Skip Miller - Field Assistant

Your orchard may vary from where this data was taken. It is intended as a general guide only.
Each grower should consider past history, trap counts and other input from your pest control advisor.

Yuba City location - Lincoln Rd. near Township (DD calculated from FieldWise W. Yuba City weather station)
Yuba County location - District 10 (DD calculated using FieldWise N. Marysville Weather Station)
