

## **Prune Aphid Control Field Meeting Planned for Thursday, May 13.**

The UC Cooperative Extension will host a brief field meeting in Sutter County on Thursday, May 13 to allow interested growers and PCA's to view the results of a prune aphid control trial. This trial tested prune aphid control by different insecticides applied before (October 30) or after (March 9) the traditional dormant spray timing. This trial was done to evaluate aphid control from spray timings that should reduce pesticide runoff potential from prune orchards. The meeting will start at 7:30 AM, and last one hour. Coffee will be available, but there will be no CE credit hours. Meeting location is west of East Butte Road just south of the intersection of East Butte and Sanders Roads. Meeting signs will be posted to direct visitors to the location. Please call Franz Niederholzer at the UCCE office in Yuba City (822-7515) for further information.
